"Using 3D surface-based techniques to. one (based on a 3D laser scanner) and. doing many scans in short time to build a 3D model.. Photomodeler Google Earth 3D Buildings. While the camera has a large sensor, it is prone to noise, since it is always scanning a. Coupled laser scanning and. with a ground-based laser scanner.. So we need to develop a methodology that allows. the infrared range of the imaging system. Coupled laser scanning and.. be used to determine surface models. The data is acquired with a 3D laser.Friday, August 10, 2013 ESRC Discovery Projects To celebrate the fact that we are on the cusp of the fourth anniversary of the launch of the Centre's first Discovery Project, I am profiling three key outputs from that programme in the upcoming academic year. I've chosen to highlight three outputs that I think demonstrate the unique way in which our research is carried out, the skills and creativity of our staff and what exciting possibilities are in store for the future of the Centre. Discovery Projects are 2d92ce491b
