Basic Download Manager License Key Full [Win/Mac]

Basic Download Manager (Bim) is a java based application developed for users who wish to download large files from the internet or intranet without having to click to download button for each file. You can also resume previously complete downloads or schedule them to start at a later date. Basic Download Manager Features: Easy to use (instant to use) user interface; Automatically resuming existing downloads and notifying user when downloads have finished; Ability to schedule downloads or when they start from the next day or hour. Basic Download Manager Download:

Download of a single file is not supported. You can download lots of files all at once by downloading the modules for the application using the download manager installation package. You also have to install Bim Server to enable the server to receive and download the files on your computer. Downloading: By default Bim will store files in it's default directory but they can be stored in other directories, you specify where to store the downloaded files in the application's settings. File transfer is only supported between local, LAN and internet sites. Basic Download Manager Server: Basic Download Manager Server is a Java server application which accepts user connections and downloads the files from the internet or intranet. Basic Download

Manager Server Features: Hosts up to 24 virtual hosts. No limit on the number of simultaneous user connections Automatic support for multiple servers and multiple download managers All host endpoints can be reused by another download manager You can also create Custom User Agents if you wish to have a different user agent than the default one.
