Platform: Windows 7 (Win7HomePremium-x64) I had similar problems when i was using a LG G3. I deleted its pictures, while my phone still had them and was able to see their EXIF data. When i inserted the phone with the correct orientation it was rotated automatically. I am also not sure about the EXIF data. I know i must check the delete option in the program, but the phone still had the old exif data Author: A.
