1. Why should I use Media Library Sync? Library Sync is the best solution for media storage and synchronization. It allows you to sync a local hard drive and one or more network shares to any number of local computers. You can even sync a large number of drives simultaneously! Simply drag and drop files and folders from your local hard drive to a library and they will be uploaded to the central library. When you click a library on any of your computers, the files will be

synchronized and you can view the files that have been uploaded to your central library. You can also sync files between your different libraries. Library Sync uses the newest "High Performance File Sync Technology" to ensure fast and accurate synchronization. As long as you have a network connection, you can easily set up a large number of libraries. If you only have a local hard drive, you can easily synchronize it.

2. What types of media can be synchronized? Any media files can be used to sync media files. You can sync any type of media files, including movies, music, books,

data and more.

3. What does Library Sync support?

Windows 2000/XP/2003/Vista, 2000/XP/2003/Vista Library Sync provides a great solution for quickly synchronizing a large number of files and folders to any number of computers or removable drives. You can sync media libraries between local and remote hard drives and network shares. You can even sync multiple libraries simultaneously. You can view and play media files on any computer where the library is located. You can quickly and easily share folders and create backup

copies of your data.

4. How does Library Sync work? Library Sync is a very intuitive and easy to use software. Simply drag and drop files and folders from the computer to the Central Media Library. Then, you can add other libraries to the Central Media Library. When you double click on a library, all of the files will be synchronized to that location and you can view all the media files.

5. How do I use Library Sync? On any computer where you want to use Library Sync, right click on the Library icon and click "Add Library". After you add the library, double click the library

to open it. On another computer where you want to use the Central Media Library, just drag and drop any of the files from the computer where the Library icon was originally located to the Central Media Library. You can also

What's New In Media Library Sync?

Media Library Sync is a powerful tool that allows you to sync a large media libraries. The only software that offers such an ability with ease-of-use, Media Library Sync is also fully compatible with all Windows environments. Media

Library Sync automatically checks the source and destination paths and all other settings. This ensures the following three goals of Media Library Sync: 1. If you have a specific destination you want to synchronize to, the Media Library Sync software will ask you if you want to synchronize to that destination. 2. Media Library Sync synchronizes folders regardless of their size. 3. Media Library Sync synchronizes libraries, regardless of the amount of media and files in them. The tool not only supports all standard Windows file systems, but also FTP

servers and HTTP web servers. It is able to sync with Microsoft SharePoint, as well as Media Library Sync works with other Windows applications, such as iTunes, Windows Media Player, Windows DVD Maker, etc. Features:

- * Seamless integration into your Windows environment
