To begin, open the program and select “Add files”. After the choice of format is made, you are required to specify the size of the files you want to split, and the program provides you the option of splitting by date, year, or folder, and by size. If you want to split by size, just choose the value in MB. You are also required to specify the destination folder for the split items. If you want to split by date, you are required to decide the interval of time (e.g. by month, day, week, year, etc). If you want to split by folder, click on “Format” in order to pick the folder where you
