* Photoshop CS6 * Photoshop Elements 12 * Photoshop CC ## CADDING WORKFLOW From the beginning of a project, you might set up a workflow based on a software package. With this system, you can group tasks in a step-by-step fashion. (Some people even use a workflow system like this for daily tasks, such as writing a weekly e-mail.) But when it comes to design, it is impractical to try to do everything in one step, unless you're the type of person that can get by with just a coat of paint. Here are the basic steps for using Photoshop to create a design: * **Figuring out your image and organizing it on the canvas:** This means, essentially, converting an image to the appropriate Photoshop format and then organizing the image into layers and groups. * **Creating various styles and effects:** Maybe a typographic effect will be needed to create a custom-looking piece or a special paper treatment will be included, or you just need to find the right font for the type of content you're creating. * **Making the overall design:** This usually involves a number of different layers and/or groups so that you can adjust colors, effects, and so on. * **Saving, printing, or exporting the final product:** At the end of the project, you want to save your work and prepare it for printing. In this book, we'll use the term "Photoshop style," which is an industry-wide reference to the conventional way in which Photoshop users organize and apply different type effects on a finished design. There are countless different styles to experiment with and choose from. # GETTING THE FACTS Versioning is one of the many features built into Adobe Photoshop CS6. Versioning is a way of keeping track of changes that you make to your project, so you don't lose what you've worked on. Another aspect of versioning is the update process, which means that you can usually convert from one version to the next when updating. For example, if you have two versions of a project: * Version 0.5: This version was developed and saved on May 16, 2014, and contains all the work you did up to that date, including your edits and the progress you've made. * Version 0.6: You decided to make some changes to Version 0.5 and save a

All About Life Posts for tag: healthful diet In an effort to remain flexible and avoid getting stuck in a routine, I'm eliminating the coffee and sugar I'm used to having each day. Instead of having a hot cup of coffee in the morning (or the afternoon), I find I'm much more inclined to have a cold drink instead. I know I shouldn't start my day with a caffeinated beverage, but I do have one every day, usually when I'm in the car. In an effort to give myself a good habit, I give myself the option of having a cold drink every morning, and I'm trying to make that extra effort an ongoing habit. Instead of a smoothie, I'll have a gingerale or peppermint tea. It's much better for me than having an extra helping of ice cream. The office is so far away from my home that I don't have time to bring my lunch with me. What's the best way to bring a healthy lunch to the office? Can I put a cooler in the trunk of my car? Can I have my lunch at a restaurant? Is it better to make my lunch at home? My husband and I are also trying to eat more locally-grown and organic foods. We make a goal of picking up our own groceries, a challenge that's more difficult for us than it was previously. We may have to expand our grocery list, but the effort to eat healthier and keep our money in our local economy makes the effort worth it. I love eggs. They're pretty much the food group that's dearest to my heart. My mom taught me how to make a simple, egg-y breakfast, and I've continued the tradition. I'll always have eggs for breakfast – maybe even for dinner, too! If I'm traveling or at a friend's home, I'll always make a few eggs to go with whatever is for dinner. Eggs can be eaten on their own or they can be used in many ways, from omelets to egg salad to eggs Benedict to frittatas to eggs in everything. One of my favorite ways to eat eggs is egg salad, which is something I've made in my own kitchen for years. I like to keep the eggs and veggies separate so I can
