The major milestones in AutoCAD history are listed below in chronological order. See also: Origin of the name AutoCAD

In AutoCAD, the "auto" prefix usually refers to a descriptive element. In the case of AutoCAD, it refers to AutoCAD's modular, or "auto-configurable," design principle. This principle was introduced to enable users to develop (create, edit and modify) a number of different types of drawings all from a single window. "CAD" (Computer-Aided Design) refers to a computer-aided means of design, which is a way of producing engineering drawings, specifications, and any related documents using a computer. "Auto" prefix refers to "Auto"rithm, meaning "mechanical (mechanical) or automatic (automatic)". The full name of the product is AutoCAD, which in English means "Automatic CAD" or "Automatic Computer-Aided Design".

AutoCAD history The AutoCAD history goes back to the late 1980s, when Autodesk was founded as a wholly owned subsidiary of the California-based corporation on March 28, 1982. In 1982 Autodesk was known as DynaTec, an American division of the Japanese company NEC, which used the use of an American name to establish a better identity for its software products. Autodesk acquired the Computer-Aided Design (CAD) software company Aperto Software in June 1992.

Around 1992, Autodesk began offering its AutoCAD software via local Computer Resellers (CRs), who sold the software as part of a bundle including a PC or PC workstation, an AutoCAD Graphics Tablet, and a serial cable. This bundle was sold as an "AutoCAD," meaning a single package for the entire set of required products, but the name was not registered with Autodesk until 1995. Autodesk began its AutoCAD retail store chain on May 1, 1993. The retail stores sold AutoCAD and AutoCAD LT (a later, smaller-sized, version of AutoCAD) plus accessories, including AutoCAD-compatible graphics tablets, along with related software. The store also sold hardware, including PC workstations and related accessories. The retail stores were very successful, but Autodesk filed for bankruptcy in March 1994. After a reorganization, Autodesk exited

Once it's activated, launch the tool as an Administrator and copy the "AppID" string. Go to the Autodesk website, enter this app id in the keygen and set the keys you want to use. Go to Autodesk website and enter your licence key (same way you got the AppID). Then you can download the cracked program.

----- Now you can use the cracked files. The city council has approved building a 12-story residential tower next to the Yonge-St. Clair subway line, but the project has some councillors upset and some angry residents who say it will cause more traffic and parking problems. The proposed eight-storey apartment building will be one of a series of towers that will go up south of Yonge and east of Finch Avenue, but it is the only one that got approval. The project, by CityRealty, is at 168 River St. "It's big and it's ugly, it's definitely big and it's definitely ugly," said one resident. "It's a huge project." Another resident who lives on River Street was worried about increased traffic on River Street when the new buildings are built. "It will cause more traffic, parking and congestion on River Street, which is already very tight," said resident Tammie Burns. Ward 30 councillor Justin Di Ciano voted against the project. He said it will create more problems.

"The area has a history of being used as a dumping ground for various sorts of things," said Di Ciano. "Now we have a really ugly construction site next to the Yonge-St. Clair line." City councillors supported the project when it was in front of a planning committee last month. The proposal was for a seven-storey building and a three-storey basement. The building would have 194 units and total of 5,254 square feet of commercial space. There was no mention of parking at the project's public hearing Monday. But the project will require at least 100 parking spaces. A parking spot was even sold on a municipal website on Friday, the first day people were allowed to bid on them. Developer Ian Peck is not happy with the process, and said he won't proceed with the project. "We are very disappointed that our application has been rejected," said Peck. "I think the city is taking a very adversarial stance against development."
