of AutoCAD that you have been using for years if you have not yet updated to the latest AutoCAD version. AutoCAD 2020 is available on Windows, macOS, and Linux. On macOS, you can download AutoCAD for free. This is the basic version, which is only available to educational users or non-commercial users. The paid version, AutoCAD Premier, costs \$2,400 USD or equivalent. AutoCAD 2020 and AutoCAD Premier each come with a 30-day trial version, so you can see if they will work for your project before you purchase them. As a desktop application, AutoCAD is compatible with Windows, macOS, and Linux. You will need to install AutoCAD on your Windows or macOS machine. You will not need to install the software on a Linux machine. If you want to access AutoCAD on your laptop or computer, you will need to download the AutoCAD mobile app from the App Store or Google Play for your iOS or Android mobile device. The AutoCAD mobile

app for iOS is free, but it only provides basic functionality. You will need to pay for the AutoCAD mobile app for Android if you want more features. How to Install AutoCAD on Windows and macOS To install AutoCAD on your Windows or macOS machine, download the installer from the AutoCAD download page. The download is a compressed.zip file that you will need to extract before you install it. Make sure you extract the AutoCAD files to a location on your computer where you will be able to find them. AutoCAD is installed on the default folder location, so if you want to install it somewhere else, you will need to move the files to the new location after you install the software.
