The forum includes features such as news, product reviews, software tips, AutoCAD-specific software, tutorials, discussion and customer feedback. In 2011, Autodesk Technology Network's AutoCAD Exchange started offering free online training courses on AutoCAD applications. In 2012, AutoCAD Exchange launched the first CAD training on-demand service. Autodesk Academy, a member-based membership program that teaches AutoCAD to entry-level users. AutoCAD Exchange Online, an online version of the AutoCAD Exchange User Group. It is a member-based community of AutoCAD users, offering free online learning experiences and certification tests. The first product offering was AutoCAD exchange users in 2009. Autodesk Exchange Apps, an application store that provides a range of AutoCAD-based products, including extensions, accessories, training and tutorials, educational tools, and Autodesk Exchange for AutoCAD. Recent clinical studies suggest that mexidol may possess analgesic properties. The present study was undertaken to evaluate whether mexidol can be used as an adjuvant analgesic in the treatment of human pain. In an open cross-over trial, 36 patients received 2 mg/kg mexidol and saline or 2 mg/kg mexidol and 5 mg/kg naloxone i.v. at the same time. The effect of mexidol on experimental pain was evaluated as the difference in analgesia between mexidol and saline. Naloxone prevented the effects of mexidol, and similarly mexidol reversed the analgesic effect of naloxone. These data indicate that mexidol attenuates experimental pain to the same extent as morphine and suggests that mexidol may have a therapeutic use in the treatment of pain.Q: Azure Blob storage - Performance I am using Azure storage for my web application to store users uploads. The data is stored inside blob containers and blobs are being created for each upload. Recently I have been experiencing performance issues with the storage. My application sometimes runs into 500 errors when uploading large files. What can I do to improve the performance? A: I think the following checklist should help: Check the server you are running on has the hardware that you think it needs, as well as all the virtual machines/hosts that will be using it. Depending on the size of the data, do you need a larger than the default storage account? An Azure Storage Account has a limit of 200TB. If you are storing large files, you could upgrade to a storage account with more space. Are your firewall rules set up properly? Without a firewall, it's possible to get around the limit that your storage account has set on how much you can store. Are

Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. (video: 1:15 min.) Markup Assist improves the editing process with fine-tuned tools and layers, and can be used to align and edit text and annotations. (video: 2:37 min.) Improvements in the Stylus and Eraser tools: Inline and Stylus tools now draw with a stylus pen or finger, use a continuous line or a dotted line, and adjust line color to match the layer color. Inline tools now allow you to undo and redo strokes. The Eraser tool now allows you to erase a single line, object, or shape. A new tool called Shape Info provides shapes with extra drawing features and attributes that are relevant to the current drawing. The Inline tool now rotates objects with a single click. A new Select All tool provides an easier way to select objects on the page. Inline Selection allows you to select shapes, text, and annotations on the page and insert them as an object in the current drawing. Rotate tool allows you to rotate the selected objects. The Modify tab now includes a New Scale tool, which allows you to scale objects, and a New Center tool, which allows you to move a single point to the center of the selected object. New appearance: You can now change the appearance of the new tabs and panels in the UI. Sketch is now the default view for the Drawings tab. Changes to the UI: The UI has been modernized and now uses a light background color. The tabs in the ribbon now use a dark gray color instead of the gray that was used before. The ribbon now highlights sections that are opened in the UI. The ribbon now uses a flexible width. An additional "wallpaper" color has been added to the right edge of the ribbon. A new layer panel has been added to the top of the ribbon. What's New in The object is the new name of the class used to define the basic building block of a CAD drawing: drawings. There are two

types of objects: 2D and 3D. 2D objects are used to create 2D drawings, including 2
