Verdict Not all software is as easy to use and at such a
low price as SUPERBLOCKA. However, we think you
will appreciate this software. This is not a review of
SUPERBLOCKA, but rather a review of the software's
specifications, its features, and the programs that it is
compared to. What Is SUPERBLOCKA?

SUPERBLOCKA is a powerful and easy-to-use
application that allows you to lock your PC and protect it
from unwanted software. The application also allows you
to block access to certain websites. Users can access
SUPERBLOCKA from the Internet or they can install it
onto their PCs. How Does SUPERBLOCKA Work? The

SUPERBLOCKA application is simple to use. You just have to right-click on the program's icon, choose the "Lock/Unlock" tab, and then choose "New Password". The process is done, the new password will be applied and will be saved into the application's settings. After that, the password will be changed automatically if you exit the program or if you close it manually. You can also delete all passwords in the program using a right-click on the locked icon and choose the "Delete all passwords" option. After choosing "Delete all passwords" option, a window will pop up that will allow you to type in the new password or to select the file or folder where the master password is stored. When you finish this step, a new password will be saved into the application's settings. One important note is that the PC cannot be unlocked without the correct password. How Can You Use SUPERBLOCKA? The SUPERBLOCKA program allows you to lock your PC. This means that you can
