Crossing Species In the wild, many species of Australian animals have never seen a square yard of grassland or even a patch of scrub. Their range is limited to the type of country that grows naturally. Similarly, in our city, small squares of grassland and patches of woodland are usually better than none at all. But now is not the time to let grass run free – not when space is at a premium and the housing market is booming. Bulk Lands (BULK) must have a vision for how development proceeds at their sites, including a proper assessment of how ‘livability’ can be improved. Bulk Lands must also manage their land in a manner that is just, equitable and minimises any impacts on flora, fauna, (and people!) in their use and occupation of the land.Q: What character(s) should be used
