Very popular backup software. Simplify your work by transferring files with one click. The application works silently in the background, just set a path to a drive and press the backup button - your files will be transferred with their original metadata and folder structure on another computer.

Important features: Safe backup: no risk of file damage; simply choose a backup location and press the backup button. File

duplication: a full copy of the selected files and folders is created in any selected location. Folder duplication: a copy of the selected folder and all its content is created in any selected location. Temporary files dumping: the application uses a special unique symbol to mark files that are not to be stored. Batch file processing: control all operations by a text file. Mass transfer: preview the contents of a selected folder and transfer them to an external drive. Advanced search: specify the path of any selected folder and perform a file search. Support for FAT and NTFS filesystems
Able to handle the size of a single file and folders: less than 1 MB and more than 2 GB. Ultra low memory footprint; does not use any external libraries (i.e. DLL files). Very easy to install and use. Free: you can

try the application before buying it. Note: a 30-day trial version is offered; after that it will cost \$5. However, you can have the trial version for free for 30 days. XP Disk Cleaner is a fairly new backup software. However, over the years it has become one of the best programs for backing up your files. Some people might not consider backing up their computer files as something so important to do, but it is important for at least two reasons: First, any files on a hard drive can be damaged or destroyed by various reasons, such as malfunction of a file system, hardware failures, program failures or human errors. Second, backing up your data can help you prevent such accidents from happening. XP Disk Cleaner is a very efficient and user-friendly program that allows you to back up

your files in any configuration. For a backup drive, you can use an external USB hard drive or an internal hard drive. For backups, you can configure the application to work by clicking Start, then Control Panel, then System and Maintenance, and then Backup and Restore. To configure the backup options, click Backup and Restore. See the XP Disk Cleaner application screen or help for detailed instructions. More precisely, the
