Cursor Translator is a simple tool to translate words on your screen What's new in this version: version 1.3.3.1 - fixed an issue where it stopped working if there are too many translations version 1.3.3 - added translation for the "home" button version 1.3.2 - added translation for the "find" button in

File Explorer version 1.3.1 - added translation for the "More options" button version 1.3 - added translation for the "New (Win10)" button version 1.2 - added translation for the "menu" button (Win10) version 1.1 - fixed a bug with the software hanging in Windows 7 What's new in this version: version 1.2.1 - added support for the Windows 7 "menu" button version 1.2 - added support

for the "New" button in the start menu version 1.1 - fixed a bug where the software hangs in Windows 7 What's new in this version: version 1.1.1 - fixed a bug where the software doesn't stop translating if you double click on a translation version 1.1 - added support for the Windows 10 "New" button in the start menu What's new in this version: version 1.0 - initial release For Windows 7, Vista and

XP, you can run Cursor Translator as a portable app (installable to the Desktop). The Windows version only requires that you have installed a language pack for the language you want to translate. - Since some of the images in the game are oversized, I suggest to use the following AutoHotkey script to resize them. #Shrink the images by 80% #!_G_l_s_g.ahk #!_G_l_s_g.ahk #!_G_l_s_g.ahk

#!_G_l_s_g.ahk # #Sets the hotkey for the player: # #g = Green flag: Kills the enemy for 4 seconds #r = Red flag: Onmouseover it kills the player #k = Blue flag: Onmouseover it opens the menu #d = Diamond: Onmouseover it opens a treasure chest # #All other keys of the keypad work as well #I'd love to set a different key for

What's New In?

Cursor Translator looks like a handy app to have around for the situation when there is something to translate and there's no time to go on the Web to do it. Translating words just with a simple mouse move sounds great, but not for Windows 10 users. The application have lots of years behind by the looks of it, but that shouldn't be a problem as many old apps were adjusted to work with

newer architecture. Not the case with Cursor Translator. Despite it being graphically overhauled, the functionality seems to have been lost somewhere on the way, as only things inside the UI can be translated, and that doesn't appear to be the point. As for Windows 8,7 and lower instances users, this tool might be of some help. The interface has almost nothing to it except the "How to" tip and the

language selector. As the app instructs, one has to press and old down the Shift key and move the cursor over any word on the screen. The translated text should take the place of the info phrase. To conclude, Cursor Translator sounds like a very helpful translation app, indeed, but without a proper port to Windows 10, the audience is going to fall on the shorter side. v2.0.3 - - Fixed a crash on the app reboot - -

Added an option to disable the stuttering sound (keyboard sound, mouse pointer sound etc.) - - Fixed missing translations in some languages - - Made the installers smaller (less then 2MB) - - Improved Cursors' translations - - Added online translation (first time online and offline) - - Now possible to toggle between left and right handed mode (ie. with mouse wheel left/right pressed) - - Now possible

to toggle between keyboard and mouse mode (ie. left click/right click/middle click) - - Other minor fixes and improvements. v2.0.2 - - Fixed a crash on the app reboot - - Added an option to disable the stuttering sound (keyboard sound, mouse pointer sound etc.) - - Fixed missing translations in some languages - - Made the installers smaller (less then 2MB) - - Improved Cursors' translations - -

Added online translation (first time online and offline) - - Now possible to toggle between left and right handed mode (ie. with mouse wheel left/right pressed) - - Now possible to toggle between keyboard and mouse mode (ie. left click/right click/middle click) - - Other minor fixes and improvements.
