## **QRemoteControl-Server [Updated-2022]**

An application for controlling the PC from your computer and your mobile phone. QRemoteControl-Server runs quietly in the system tray and awaits connections from your computer and your mobile phone. In order to use it, you have to connect your phone and computer to the same wireless network, start the server and make sure that the listening port is available. The client application is available for Android, MeeGo and Symbian platforms. The client application allows you to control your PC using your mobile phone, for example to change the volume, control an application in the computer or perform some other actions.

Features: • Lots of predefined commands • You can create your own custom commands • Control your applications • Change volume, mute/unmute and switch between audio tracks • Change system time • Change WiFi enabled or disabled • Click on any window • Zoom in and out • Bring window to the front • Activate sleep mode • Execute custom commands • Play next track • Transfer files • Add new processes • Changes the desktop wallpaper • Start a new tab • Take a screenshot • Set preferences • Go to any apps or websites • Start or stop a service The server has been specially designed to work with Symbian, Android and MeeGo phones. The application is available for all of them. QRemoteControl-Server is a free program. Supported platforms: OS: Symbian S60v5 OS: Symbian S60v5 Platform: Symbian Mobile Networks: WLAN, 3G, GSM, UMTS, CDMA Requires OS: Symbian S60v5 Repository: Portable: Yes Filetypes: \*.\* Supported Languages: English (en) Download QRemoteControl-Server Portable right now! You can use it right now if you want to start your activity on Symbian or Android devices from your PC with a single button. We can suggest other applications to you. XBMC for PC Pro with Remote Control is the best Media

Center for All popular devices. You can Control your Windows PCs from PC, Android, iPhone & iPad. Supported: PC: Windows 7/ 8/ 8.1 Android: KitKat 4.4+ XBMC should support Windows 10 Note: There are a lot of bugs. I am very sorry. It is a work in progress. DISCLAIMER:

## **QRemoteControl-Server License Key Download**

QRemoteControl-Server is a handy application designed to help you control your PC remotely using the mobile phone. QRemoteControl-Server runs silently in the system tray and awaits for available connections. In order to use it, you have to connect your phone and computer to the same wireless network, start the server and make sure that the listening port is available. The client application is available for Android, MeeGo and Symbian platforms. The client application comes with predefined commands to let you change the PC volume, switch windows, activate the sleep mode, zoom in and out, play next track and so on.
