► Show 1-24 of 123 reviews Porofessor (Porofessor - UI for League of Legends) Porofessor is a free app to help you improve your gameplay in League of Legends. It includes tools to track your performance and find the most effective champions and picks, as well as an in-game overlay that will keep you up to date during the game. A few days ago, a post appeared on Reddit asking people to rate their favorite League of Legends apps. It's a task we're all familiar with—though only a few can say they've ever actually played a League game. So we decided to go the extra mile and create a few of our own to take the edge off the ol' tension. Try it now: Find out which one you're better at using and also watch this segment of Porofessor's interview with Riot Games' lead gameplay designer, Daniel Chang, and lead eSports producer, Ben Batista.

League of Legends - Best VPN for P2P Games - Best Free VPN for All Devices League of Legends is a free-to-play multiplayer online battle arena video game by the South Korean developer Riot Games. It was originally released on September 27, 2009 and is currently available for Microsoft Windows, Mac OS X and Linux. It is the sequel to the 2007 video game League of Legends, and is the world's most played online video game.[1] Over six million people worldwide play League of Legends every day. There's a reason that League of Legends is the best free-to-play multiplayer online battle arena video game. From the moment you log in, you're thrown into a competitive PvP environment, where you can battle against other players, each of them trying to destroy your minions. The thing that sets League of Legends apart from other MOBAs is that the gameplay revolves around the concept of a "lane". These are areas of the map where monsters spawn, which forces you to fight the minions on your side of the lane first. This gives you a better chance of pushing ahead and winning the match. How to Play League of Legends - League of Legends Wiki Guide The game also has a very useful team command system that will allow you to control multiple champions at once, and also allows you to direct your teammates to attack enemies or the turret. During a team fight, you can also go in and help your allies, giving them special abilities, such

KeyMacro is one of the best tool to auto-edit text in the iOS ecosystem. You just add a word or phrase, highlight it and tap the menu button, and it'll be turned into any iOS keyboard's keystroke or short cut. After a period of use, the application will learn your habits and automatically change your text to the preferred one. In the settings, you can choose between any keyboard and hotkeys, including Win or Enter for the iPhone, and then add any key combination you want. The latest update to the application added more options, such as being able to copy-paste from Notes, which is convenient when you're working with remote editors. [Edit] There is also a "one click create keyboard" button that'll turn every word or phrase into a shortcut. It's an essential feature for people that use "type to text" apps a lot, like screenwriters and journalists.
