Chimera Tool (CHIMT) is an easy to use support tool for Samsung, HTC, LG, Sony, Huawei, Blackberry, Motorola, Nokia, Generic Android, MTK, Vivo, Xiaomi, Lenovo, Generic Windows devices. How to Verify a Sim and Activate an Offline Phones in Chimera Tool. Here I have detailed information how to verify a sim and how to activate an Offline phone of Chimera Tool. First I will tell you that what a sim card and why people need to verify sim card and activate an Offline phone? Samsung, Blackberry, Nokia and HTC phones are all used to make calls while using a sim card. To make calls, a sim card must be inserted into the sim card slot and the sim card must be activated. Another sim card that is already activated cannot be used to make the calls. As you know that today all the mobile phones are made using Android OS, for this reason when we use a android phone, we must be able to use an Offline phone because there will be no sim card installed. In this article, I will tell you Chimera Tool guide to verify a sim and how to activate an Offline phone. But before proceeding further I am also going to tell you why we should verify sim card, how to verify sim card and how to activate an Offline Sim card. First I will tell you the advantages and disadvantages of an offline phone and the reason why people would like to verify sim card and activate an Offline Sim card. To be honest, when you use an offline phone your phone will not have any or easy access to the Internet. But you will be able to call when there is no or low signal in the environment you are in. It means that you will not be able to use your phone when you are in an area that has no or very low signal. Another thing about an offline phone is that you cannot use it any more when your sim card is already activated or in good working condition. If you need to get a sim card of Samsung, Blackberry or HTC, you can download Chimera Tool version 2018. Chimera Tool can verify a sim card of Samsung, Blackberry and HTC and you can also activate an offline sim card of Samsung, Blackberry and HTC. In this article I will show you how to verify a sim card and activate an offline sim card using Chimera Tool. The Chimera Tool also supports sim cards of LG, Sony and Huawei. Many people have been using Chimera Tool to verify
