Now you can record any sound, even without the need of a microphone. You can record at a much lower sampling rate than a microphone and record even without headphones! Record and replay Record any sound using your favorite sound recorder (Free version). The Free version supports only the WAV format. If you own the pro version, you can record in any format supported by the sound recorder you choose. Simple interface Every sound is recorded from the mic. You don't need to interfere with recording settings. You don't have to manage the mic's distortion. You don't have to decide whether the mic should be turned up or down. What you want, is just record the sound and then play it back. Requirements The application requires a sound card or microphone to work. If you don't have one of them, then it won't work. Tested on: Free version 5.0 Description: MusicStacker is a straightforward and efficient application designed to help you remaster your audio files. Basic interface The application is constituted of a single window, where you can easily find and access every setting and feature of MusicStacker. Although uncomplicated and primal, with a gray tone all around, some of MusicStacker's buttons are brightly colored, in order to be easily found and accessed. The "Stop" button has an intense red color, while the "Play and Record" one is bright-green. Even though none of the colors can be changed, nor the chromatic theme of the application, you can still customize the width and height of the main window. Easily remaster audio files MusicStacker gives you the option to automatically select the sound card, making the entire process a little easier. The program also selects the sound device from the ones identified on your system, but leaves you the choice to select another device at any time. The application identifies any sound lines currently connected to the system, allowing you to choose the one you prefer to be used in the remastering process. Another option you can choose is the gain of the audio file, allowing you to pick a value between 0 to 20. A quick shortcut key for toggling on or off the custom settings can be found in the lower side of the main window, right next to the "Save" button. Various audio formats Music
