
Shot Designer Torrent

When I laid out the scene in Shot Designer, it was very simple. When it came time to shoot, I just kept track of the shots on my layout and checked them as I went. The next day, when I had already filmed the whole scene, I spent two more days with photography, but not in the usual way. The first time I turned on Shot Designer, I gave it a five second exposure and used AF-A to focus the camera on the subject. Then I just pressed the camera's shutter button and shot. I took only one frame for each shot, then I reviewed the resulting shots and took another shot.
