The tool lets you secure your login credentials to different websites. Of course, it's important to backup your data and keep it safe. Since the PIN code is located on the key that you press to login to the computer, if someone gets a hold of your key, they can take your credentials and login to the PC. This software can improve your productivity and security by creating logins that you can use in multiple locations, saving you the hassle of creating and managing credentials for each website, program and other device you use. For example, you can create a login that you can use to access multiple websites, your bank, Facebook, and other accounts without having to constantly enter your username and password each time. This way, you won't have to have a token or voucher key in your wallet or purse, so you don't have to worry about leaving your physical access to your computer and other devices. Likviber is a useful and elegant app designed to provide users with a way to manage and create logins for different websites, programs and other online accounts. The software can be used in both offline mode, and as an app, giving users more control over their data. You can add additional login data for the app from the app's main menu. In addition, the app supports browser extension technology to open links directly from Likviber to your desired destination. One of the features of Likviber is its ability to encrypt your data when it is stored on your computer, making it very secure. All stored data is encrypted, and can only be decrypted by you, the user, when you are ready to view the data. This software is very easy to use,
