Powell came off the bench for England and scored the only goal against Croatia in the final on Sunday to end a trophyless 10-year wait for a first title. The 20-year-old believes some key players will want to leave in the close season to accommodate younger players. "When you look at England's World Cup campaign, you can be sure a lot of the key players will want to leave and a lot of the younger players will want to come in," said Powell. "I hope some of those are in the England squad - but I don't know if they will be." Players who could be offloaded include Manchester United's Ashley Young, West Ham's Stewart Downing, Liverpool's Raheem Sterling and Everton's Ross Barkley. Cambridge Citizens Cambridge Citizens is a nonprofit organization that helps non-profit organizations with their technology needs. The organization's primary model is for grantees to get free resources in exchange for working to give the resources away. The organization was founded in 2009 by Josh Wolfe and Amanda Longacre, and is headquartered in Cambridge, Massachusetts. History First years Cambridge Citizens was founded in 2009, and began as a donor-driven grant from the Annie E. Casey Foundation. It provided small grants to local non-profits that fit a certain framework. This framework allowed Cambridge Citizens to help non-profit organizations that were: An affiliate of a larger national non-profit. A 501(c)3 non-profit. 100% funded by private donations. Based in Cambridge. In need of a technology upgrade. In early 2010, the Annie E. Casey Foundation decided to shift the focus of their funding away from making grants to providing technology expertise. The Casey Foundation is no longer accepting requests for Foundation-funded grants, though the organization continues to accept funding from individual donors. By 2010, Cambridge Citizens' grant budget was approximately \$500,000 per year, and the

A Set contains all the elements I'm dealing with. Element A needs to be removed, but I'd like to do it on the basis of something other than A.equals(something). What I'm looking for is a way to remove an element if it does not contain it, or if the element is found in A itself. Is it possible to do this using a Set? A: List elements = new ArrayList(set); Iterator it = elements.iterator(); while(it.hasNext()){ Element element = it.next(); if(!(element instanceof String)){ if(!(set.contains(element))) it.remove(); } } you can use the above to remove an element if it's not in the set. package
