What's new in Fifa 22:

- **Introducing 'SpeedFactor': EA has made progress in developing the in-game system to improve player reaction time. Using this, 'SpeedFactor' will allow players a greater ability to anticipate and make the right decision at the right time. Press 'C', run up towards the ball and be ready to sprint, or skip the ball as soon as you see it coming towards you.**
- **Pitch-side cutting - players will have the option to cut in almost any direction on the pitch with the new 'Cross-Pitch Cut-ins' feature allowing dribblers to inch forward to make the pass. Players will be able to leap over the 6-yard box and tuck the ball between the legs or head for the near post to go it alone.**
- **'FlyKick': Another way to check out the new Cross-Pitch Cut-ins feature, the new 'FlyKick' feature enables players who are on the ball and occupying a less than optimal position to kick the ball to any nearby player or the goalkeeper on the goal line. Make sure you're on the correct pass, and in the right area of the pitch, to receive a perfect powered shot.**
- **Increased Kick Off Accuracy: Players will be more accurate when they take the shot, meaning more chances and pressure to score.**
- **FIFA 22 introduces the new 'Pass Intensity' system. The intensity in which players passes the ball will vary depending on several key factors including player speed, distance from play, defender presence and the quality of the pass. This system will represent realistic play and improve player and team strategy, making gameplay more interesting and creating opportunities for the full range of pass types.**

-
- **Career Mode:** Players can build their game on the park, making their name in the youth teams. The transfer feature will be vastly improved, allowing you to manage all of your players and to recruit new ones through selection in the transfer market, giving you full control of your squad.
 - **Custom Game:** A new feature where you can create, save and share your own custom game type through the FUT story mode. This will allow you to capture your best match with different strategies and custom settings. These features can also be shared on the MyClub social features.
 - **New Open Gameplay Features:** Create a custom FIFA 22 with official, licensed clubs, kits, players and venues
