The goal of this guide is to help you use Photoshop or Photoshop Elements to create your own memes and gather images or create new high-quality images. This guide will show you how to edit text, add text to existing images, create new images with text or both. Note: we are not going to cover the tutorial to use Photoshop or Photoshop Elements to edit images or create new high-quality images. For that, there are many tutorials available on the Internet. We will only cover the best memes, high-quality memes, good text and the best features of Photoshop and Photoshop Elements. What is Photoshop? Photoshop is the world's most popular graphics editor for creating and editing photos, graphics, logos and design elements. Photoshop is the most used graphics editor in the world, with nearly 90 million monthly active users. What is Photoshop Elements? Photoshop Elements is the world's most popular desktop image editor for digital photographers, graphic designers, web designers, emoji creators and hobbyists. It is the fastest, easiest way to organize and edit photographs in addition to the ability to make artistic edits. Which is better Photoshop or Photoshop Elements? Photoshop and Photoshop Elements are almost the same except for some cosmetic changes. Photoshop Elements was created because it offered more features, especially for consumers. Most of its features are available in Photoshop. It is also great for people that want to edit and save their photographs without using a computer. If you need to edit a photo, save it for your computer or mobile device or to use Photoshop elements for free and edit high-quality memes, you should go for Photoshop Elements. The best memes In order to create a good meme, you need a good idea and the right memes. That's where Photoshop and Photoshop Elements come in. How to create memes with Photoshop For this guide, we will use Photoshop to create memes and we will add some memes from Photoshop Elements. Method 1: Add Text to an Image First, start Photoshop. Open an image and add the text you want to add to it. In this case, we will use the default "placeholder" text and add our text. Click on Edit > Text > Text from the menu bar. The "placeholder" text will turn into text you can edit. For this guide, we will use Arial Black Regular. We will use the font Arial Black with regular and black for these memes. 05a79cecff

Sunday on ABC's "This Week," former White House National Security Council staff member and adviser to President George W. Bush, Elliott Abrams, said the United States should support the Syrian Democratic Forces (SDF) in its battle against ISIS and "look at the aftermath" in post-ISIS Syria. Partial transcript as follows: GIBBS: So when we say that we need to be ready, and we've already moved forces out, we've already begun to train, what exactly does that mean? ABRAMS: Well, first of all, we have to think strategically. We have to think about where ISIS is. Now we're taking it on. We're establishing a no-fly zone. We're establishing safe havens on the ground. We're doing all kinds of things. We do need to be ready to continue to do more. In a perfect world we would use the Kurds. We should be encouraging the Kurds. The Kurds are a terrific partner, and I see nothing wrong with providing arms to them. We already are and we've moved already. But, we have to think strategically about what we're looking for from the campaign against ISIS. I mean, my God, it's going to be a matter of weeks, maybe months, if that, and then we're going to have to look at the aftermath and how do we handle the situation when this conflict is over. So I — what you're seeing, I'm sure, is what my view is at the moment. I think this is a terrific initiative. I think at the same time, it's difficult, and we have to look at the situation in Iraq. But this is important. We can't pull out. We have to wait and see. We can't pull out. We have to wait and see. I mean, it's good to send 300 troops, but the question is, what do we do in the long run, and especially about the reconstruction. We have to think about that. I'm not the Arabist of the American foreign policy, but I think very highly of the Kurdish forces. I've met them. They're terrific. I think they're terrific. At the same time, they're — if we don

Q: creating an array based on list of values in pyspark I have a pyspark dataframe (df) having the following columns: user_id, action_date, action_type I have a list of unique values (uniquelist) which I want to have an array corresponding to each row in my dataframe (df). Following is the list of elements in my list:
['user_a','action_date','action_type','user_b','action_date','action_type','user_c','action_date','action_type'] Based on this list, I want to have an array corresponding to the dataframe I have tried the following: unique_list_of_dataframe = [] for i in uniquelist: unique_list_of_dataframe.append(df.get_joint_array(i)) But I get an error: Error: Cannot get moment from NULL. The get_joint_array returns a dictionary of arrays. So when I pass the list of elements, it is throwing an error. If I pass the string 'action_date' it works. But it also doesn't work when I pass a list of element values instead of a string. How to resolve the error?
A: get_joint_array returns a dictionary as shown below: df.select('user_id','action_date','action_type').show()
+-----+-----+-----+ user_id | action_date | action_type | +-----+-----+-----+ user_a | type_1 | user_b |
| type_1 | user_c | type_1 | user_d | type_2 | +-----+-----+-----+
df.select('user_id','action_date','action_type').head() +-----+-----+-----+ user_id | action_
