FIFA season mode features comprehensive changes that have been made based on key player feedback. A brand new ability allows you to put the ball anywhere on the pitch, and adjusts to the player's skill level based on whether he has spent the last season running the midfield or playing with the backline. In addition, you have more tactical freedom to set-up your team's attack with a smart new 'casual setup' mode, which lets you play matches with a manager from the FIFA franchise era. The new Career Mode also includes more FM/League content, and a new Career Mode difficulty setting - set to "Hard" - which will test your skills and tactical awareness. The pre-assigned team AI also now have 11 new Personality traits, which will affect their playstyle and behaviour in the game.

Each will have an effect on how they use the ball, and pass and shoot at different speed and accuracy. You can also change the tactics and formation of the AI team, and how many players each has. There is also a new pre-season difficulty setting, which will take you through all the pre-season matches in the mode. FIFA 22 is available to play now for Xbox One, PlayStation 4 and PC. Xbox 360 and PlayStation 3 are available to download the game at no additional cost. To see a list of PC systems certified for the game, visit Key Features: Real Player Motion Capture - The "HyperMotion Technology" engine is made of players that come from real-life matches that were analysed using a wide range of motion capture equipment to create the "UltraPlayer" engine, allowing you to more accurately reproduce individual player movement. Create-a-Club - Players can be transferred to your club and all virtual equipment will be allocated according to player proficiency. Dynamic Tactics - Play any formation and watch players adapt to keep up with your tactical changes on the fly. Ball Physics - The technology behind the ball will now be fully developed, and FIFA will react in a much more realistic way when the ball is kicked, passed and shot.
