Cut out a tiny square from a huge image and you may lose some of the design information. Cut out a small square from a huge image and you may chop or smear design elements. I recommend using the Cutout tool for any task involving creating your own frame or a `.png` file. The Cutout tool lets you remove a graphic object from a background and save it as a single file, so you don't have to worry about losing any more information than necessary. * * * * **Windows:** _`www.dummies.com/go/elements` * **Mac:** _`www.dummies.com/go/elementsmac` ## Creating Simple Documents This program enables you to create documents for fax, email, and other printer-friendly formats that can be printed in a matter of seconds. Example embodiments relate to an organic light emitting diode, a method of fabricating the same, and a display apparatus including the same. Recently, flat display devices have been widely used to replace a Cathode Ray Tube (CRT) display device. The flat display devices include Liquid Crystal Displays (LCDs) and Organic Light Emitting Diode (OLED) displays. The OLED displays are classified into a passive matrix OLED (PMOLED) and an active matrix OLED (AMOLED) according to a driving method. The AMOLED displays may be classified into a top emission type and a bottom emission type according to a direction in which light is emitted. The top emission type AMOLED displays may be referred to as a top emission AMOLED, and the bottom emission type may be referred to as a bottom emission AMOLED. The bottom emission type AMOLED displays have a structure in which, for example, thin film transistors (TFTs) and organic light emitting diodes (OLEDs) are formed on a substrate. In a region in which the TFTs and the OLEDs are not formed, an oxide layer and a passivation layer having an aperture corresponding to the TFTs and the OLEDs are formed. As a result, the TFTs and the OLEDs may be partially exposed through the aperture of the passivation layer. The TFTs and the OLEDs may have a parasitic capacitance C_{gd} that occurs when a drain electrode and a gate electrode of the TFTs are electrically connected to each other, and an organic light emitting material of the OLED. I myself am a hoe, and I'd say I am a hoe for a reason. People love me for it, and they are usually interested in me. So next time you are mad at a hoe for being with a guy she dumped, remember that it's about love, not sex. The Urban Dictionary T
