What is Roblox? The best way to answer that question is: you'll have to play it to find out! A platform for kids to create their own games, play their creations, and connect with friends via virtual worlds. One moment you're fighting an onslaught of zombies, the next you're part of a clan of space ninjas. What is the one thing that unites all of your worlds, games, and activities? Robux - the in-game currency of Roblox. Game developers earn Robux by creating great games, and they can spend it on things in their world. Each game has a code that takes Robux to create that game, and Robux are also earned when your friends play your games. The more people that play your games, the more Robux you earn - and what better way to make new friends? Getting people together in the real world is as easy as making a link with an email address. The more you're connected to your friends and the game worlds, the more fun you'll have. With the introduction of MMO worlds, you can even play together in real time, creating amazing experiences together. It's never been easier to play games. So what are you waiting for? Come play today! Screenshots for Roblox Roblox Editor App Screenshots Roblox Guide: Roblox is an online virtual game creation and social platform, where users create interactive stories with a virtual world that can be accessed from anywhere. Users can play games written by other users in the platform, or create their own games. To play games, users can create an account at roblox.com, then install the Roblox game engine on the computer that they're gaming on. Once the game is installed, users can then log in to the Roblox website or use an app to log into their in-game profile. When playing a game or creating a world, users can earn Robux from other users if their gameplay is streamed to their Roblox profile. Robux can be purchased with real world money,

or through in-game purchases. Games on the platform can have both single-player and multiplayer content. They can have a wide range of features, such as 3D graphics, and community features. The level of detail in the game will increase as the number of users on the platform increase. During its early years, Roblox was a platform for games made for

A: There is not currently any way to get free robux, nor is there any way to make your own robux, these types of questions are considered off-topic as it's not part of the game. You can however request that a mod mark a question as a duplicate.

The present disclosure is directed to a method for upgrading a coal power plant, and more particularly, to a method for hydrogen migration and combustion improvement in an environmentally safe manner. In a coal gasification plant, coal is injected into a slurry reactor, and the slurry is heated in the slurry reactor. Hydrogen and carbon monoxide are produced in the slurry reactor, and the hydrogen and carbon monoxide are routed to a hydrogen partial oxidation unit, which produces synthesis gas. The synthesis gas is routed to a gas turbine engine, which generates electricity. In the slurry reactor, the coal is heated to a temperature of about 1500° C. or higher. However, because the slurry reactor is usually heated by indirectly-heated slurry reactor internals, slurry reactor internals and wall tubes are more prone to fouling than the gas turbine engine internals. Because fouling of the slurry reactor internals and the gas turbine engine internals requires an extensive overhaul of the gasification plant, a method of improving the heat transfer of the slurry reactor internals, and the gas turbine engine internals would be a significant benefit.

Q: jquery onclick function to remove selected class I have the following: Click Me and the following: function ShowAndHide(className) {
 \$(".selected").removeClass(className); } The class is added to the li, but when I click the link the class isn't removed. A: Your className is not a valid className. You cannot have spaces there. That is the reason that it's not working. Updated If you don't want a class as a parameter, then don't use a

classname but a string. Click Me function
ShowAndHide(className) { \$(".
