Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Roblox has contributed many games to the World Play, a platform for users to play and compete in many game genres, as well as the catalog of the Roblox Studio, a web development tool. Roblox is popular with children and teenagers. The platform's programming is designed to enable users to make their own games. Roblox programs include a "box" that can be added to a game, and this "box" will appear on Roblox games when players play them. The box can be decorated with decorations, which can be turned into "loots" or unlocked items in the box. The designs available for decorating and programming the "boxes" come from a shop known as "Worldbuild". Another notable feature of Roblox is the many friends system, which allows users to create and play games with their friends both in person and virtually. Roblox also has a contest and game jam series (known as the Bloxbite), which helps developers to create games that are new to Roblox. Many Roblox games are written and developed by independent game developers, although the platform itself provides many tools to help amateur developers create games for it. Among these tools are the Roblox Studio, a web-based game development platform, and the Studio Builder App, which enables users to create their own custom engines and share them with the community. Roblox is used by parents to ensure their children are safe while playing video games, and some schools have adopted the platform as a learning tool.
