

Secure Self-Managed Abortion With Cytotec Pill Online

ABORTION VIA MEDICAL TERMINATION PORCESS

WHAT IS MEDICAL ABORTION?

It is the safest and most secure method to end an unwanted pregnancy. It doesn't require surgery and you can take Abortion Pills online at home as well. This can be done with two different pills that is Mifepristone and Misoprostol kit online. Women prefer this type of abortion rather than surgical abortion process. This type of abortion can give you more privacy.

Get to know more about Misoprostol

Cytotec or Cytolog are known as generic name Misoprostol which is used to terminate an unwanted pregnancy within 8 weeks.

- This pill can be consumed orally or can be inserted vaginally.
- Medical Abortion can be the best way to end unwanted pregnancy without going through surgical procedure.
- This pregnancy ending pill acts to wipe out the pregnancy eggs from the uterus.

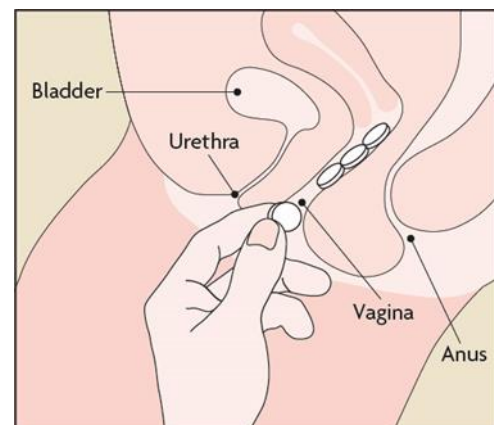

HOW IT WORKS?

Order Misoprostol online, which is suggested to use along with Mifepristone to get better results. Mifepristone works in such a way obstructing the outgrowth of progesterone (a hormone presents in females), which is required to maintain pregnancy. As the outgrowth is stopped and the absence of pregnancy hormones happens which results in breaking down of a lining of the uterus and the growth of the pregnancy stops, whereas, Misoprostol causes the cervix to soften and the uterus to contract to expel the pregnancy.

Dosage

- Day 1: Take Mifepristone 200mg 1 pill orally.
- Day 3: Take Misoprostol 200mcg 2 pill buccally or vaginally.
- Remaining 2 pills of Misoprostol can be taken after 12 hours gap.

Major precautions while ending pregnancy using Cytotec

Verify the packaging as a whole to see if it is tightly packed. The risk of contamination and injury from an opened medicine pack is present. Do not utilize any pills that are found to be in a broken or damaged state. Broken or chopped tablets may not contain enough of the active ingredient.

Additionally, you do not receive the tablet's exact results. When you buy Abortion Pill online, prescriptions for 4 pills are typically given to women who want to end their pregnancies before 8 weeks. You must consume the first Mifepristone pill within the first 24 hours. After taking the first pill,

you might experience bleeding, so keep a sanitary pad on hand just in case. She must gently clean the vaginal area before beginning to insert the pill.
