

## Heating Repairs London | [Underfloor-heating-company.com](http://underfloor-heating-company.com)

Underfloor heating systems are heating up, in more ways than one. Because this type of heating system is so efficient and convenient, it's no wonder so many families and companies are installing them in their homes and businesses. [Underfloor Heating London](#) heating systems, whether you choose to install an electric or water system, evenly displace heat over the entire floor of your home. The heat rises from the floor, keeping your home or business warm and cozy without any cold spots. These heating systems are also cost-efficient, saving the average family up to 25% on domestic fuel bills. They can also save up to 50% on heating costs for commercial underfloor heating services. And the benefits don't stop there. Underfloor heating systems mean cleaner air in your home or business. And they are much more energy-efficient than older, traditional heating systems. Radiators are intrusive and can be a burn hazard.

**We will keep your system running at 100% efficiency and performance by servicing it every 12 months!**

Underfloor heating systems are out of sight and safe, and they have the added bonus of being extremely efficient, practically maintenance-free. However, owners of such systems should perform some [Heating Repairs London](#) heating servicing on their system to ensure that it continues to run smoothly.

### Servicing Plan for Your Underfloor Heating System

Underfloor heating systems are designed to work maintenance-free for many years, making them convenient for busy families. It does make sense, though, to perform routine underfloor heating service checks to head off any major problems that could occur. Although it's easy to overlook the needs of your underfloor heating system in the warmer months. Families or companies with this type of system should run it for about half an hour each month during the summer. This will reduce the chance of the circulating pumps and valves sticking. Plus, checking that your system is running smoothly during the warmer months means that families with [Electric Underfloor Heating Repairs](#) won't get an uncomfortable surprise when they turn on their heating system on the first cold day to find that the floor won't heat up.
